

Autism is one of the five pervasive developmental disorders (PDD), which are characterized by widespread abnormalities of social interactions and communication, and severely restricted interests and highly repetitive behaviour. 'Magic always Happens' is dedicated to promoting solutions, across the spectrum and throughout the lifespan, for the needs of individuals with autism and their families through advocacy and support; increasing understanding and acceptance of autism spectrum disorder; and advancing research into causes and better interventions for autism spectrum disorder and related conditions.

5km for €5

Children's 1km for €1

In association with Episkopi Running Club

Saturday 14th April 4:30pm

Happy Valley, Episkopi

Make the magic happen in Happy Valley
